

SOMISETTY VENKATA SURENDRA KUMAR

Cloud Engineer | AWS

Bengaluru, India | +91-7095690017 | surendrasomisetty18@gmail.com | LinkedIn: Surendra somisetty | GitHub: surendra-kumar07

PROFESSIONAL SUMMARY

Motivated Computer Science graduate (Cybersecurity, IoT & Blockchain) with hands-on project experience in AWS cloud services, Python, Linux, and SQL. Skilled in building serverless solutions using AWS Lambda and hosting static websites on Amazon S3. Published researcher with a Best Paper Award for work on secure, IoT-driven healthcare systems. Seeking an entry-level Cloud Engineer role to apply cloud computing, automation, and security fundamentals in a real-world environment.

TECHNICAL SKILLS

- Cloud Platform:** AWS (EC2, IAM, VPC, S3, EBS, ELB, Auto Scaling, Route 53, RDS, Lambda, CloudWatch, SNS, CloudFormation, CloudFront, CloudTrail, Cloud Shell)
- Operating Systems:** Linux (Ubuntu, CentOS - file permissions, package management, shell scripting, process/service management), Windows
- Programming Languages:** Python, Bash/Shell Scripting
- Database:** SQL
- Networking:** TCP/IP, DNS, HTTP/HTTPS, CIDR, Subnets, Internet Gateway, NAT Gateway, Security Groups, Network ACLs
- Cloud Concepts:** Serverless Computing, Static Website Hosting, Event-Driven Architecture (S3 Triggers)
- Other Skills:** Cybersecurity Fundamentals, IoT, Blockchain Fundamentals, Operating Systems
- Tools:** Git, GitHub, Linux CLI

PROJECTS

Serverless Image Compression on AWS | Python, AWS Lambda, S3

- Built a serverless image compression pipeline using AWS Lambda, triggered automatically whenever a new image is uploaded to an S3 bucket.
- Implemented the compression logic in Python within the Lambda function, reducing image file size while maintaining quality, and storing the optimized output back to S3.
- Applied event-driven architecture principles to eliminate the need for a dedicated server, reducing processing cost and latency.

Static Website Hosting on AWS S3 | AWS S3

- Deployed and hosted a static webpage using Amazon S3, configuring the bucket for public web hosting and static content delivery.
- Configured bucket policies and permissions to enable secure public access to hosted content.
- Gained practical understanding of AWS storage services and cloud-based content delivery fundamentals.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Cybersecurity, IoT & Blockchain Technology)

Siddharth Institute of Engineering and Technology | Graduated 2026 | CGPA: 8.2

CERTIFICATIONS

- SQL (Basic) — HackerRank
- Operating System Fundamentals — NPTEL

ACHIEVEMENTS

- Best Paper Award, International Conference on Innovative Computing and Communication (ICICC-2026) — for the paper "Health Guard: A Collaborative Machine Learning Approach to Secure Medical Information across IoT-Driven Healthcare Systems."
